

Eliot Robertet

About me

Born in 2003 in Paris and raised in Iceland, I have had the privilege of experiencing diverse cultures, which has shaped my worldview and communication skills. Fluent in both English and Icelandic and proficient in French, I am comfortable adapting to various environments. My time living in London also added to my cultural and educational experiences.

From a young age, I developed a strong interest in engineering, captivated by how things work and the principles behind them. This passion has guided my academic and career aspirations, especially as I pursue a path in mechanical engineering. Alongside my studies, I was a dedicated tennis player for a number of years, competing on the Icelandic men's national team and later serving as a coach for five years, where I developed strong leadership skills and a commitment to achieving excellence. Last summer, I worked at Marel, a global leader in food and fish processing solutions. There I gathered further insight into the world of engineering.

I value discipline, responsibility, and continuous improvement, approaching every challenge with focus and dedication. I am passionate about connecting with people, naturally patient, and approach tasks with resilience and independence. My key strengths include determination, ambition, positivity, and a supportive nature. Additionally, I take pride in maintaining organization and attention to detail in all my pursuits.

Education

2022-2025	Bachelor of Science in Mechanical Engineering University of Iceland, Reykjavik Current GPA: 7.8/10 Expected Graduation Date: [may, 2025]
2019-2022	Stúdentspróf, eðlisfræðibraut (e. Physics line) Verzlunarskóli Íslands (e. Commercial School of Iceland) GPA: 8.1/10

Career

Summer employee

Marel, Reykjavík, Iceland

may/2024– august/2024

- Gained hands-on experience on the assembly line. Assembled scales, conveyor belts, and various production equipment, ensuring functionality and adherence to engineering specifications.
- Developed practical insights into manufacturing processes, enhancing awareness of the impact of design choices on production workflows.

Summer employee

Ölgerðin, Reykjavík, Iceland

may/2023– august/2023

- Operated forklifts to load and stack beverages on pallets, maintaining high standards of organization and stability to ensure safe, efficient transport and storage.
- Documented and verified all shipping details, ensuring accuracy in inventory records and smooth coordination for outgoing shipments.

Languages

Icelandic	Native language
English	C1 advanced, scored 108 on TOEFL

Computer skills

Applications	Autocad, Inventor, Solidworks, Excel, Ansys, Rstudio, Matlab
--------------	--
